

Curved Displays Featuring Optical Bonding

faytech is delighted to announce that, as a global leader in large format optical bonding services, we now provide optical bonding for curved displays. Our expertise in this field, combined with our industry-leading proprietary optical bonding glue, **CLEAR-BOND**, enables us to deliver a display that provides numerous advantages over traditional non-bonded curved displays.

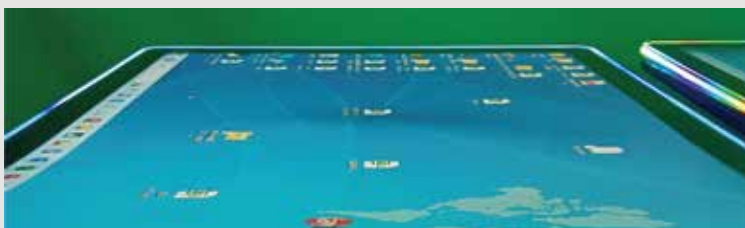

An optically bonded display offers:

- reduced reflections
- enhanced durability
- improved contrast and colors
- increased readability
- better touch performance

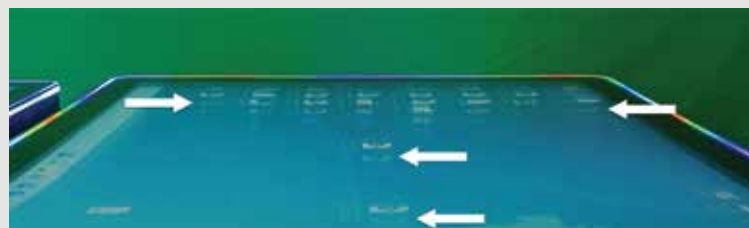

A comparison of optically bonded displays to non-bonded displays. An optically bonded display removes the “double shadow” effect that non-bonded displays exhibit.

OPTICALLY BONDED

NON-BONDED
